JLG® Electric Scissor Lifts

REACHING OUT

Today, more people are demanding environmentally-friendly equipment. More municipalities are demanding "green" building for new construction and renovations. The JLG® line of electric scissor lifts are the green machines in the lift industry.

JLG electric scissors feature longer run time, greater uptime and higher productivity. The energy efficient direct electric drive boosts your productivity with industry-leading duty cycles.

The efficient machine design means less scheduled service, a quieter work area, less dependency on hydraulic oils, and zero emissions.

From job start to completion, JLG has an electric lift to meet your needs and keep your job green.

**GIVE YOUR
PRODUCTIVITY
A BOOST**

READY TO WORK OVERTIME

Experience the benefits of reduced charging time and longer runtime with ES Series scissor lifts. You can stay on the job longer, getting more work done in one day. With only two hoses and four fittings, you're working with a cleaner machine that decreases scheduled service requirements and reduces that chance for leaks. Up to 450 kg capacity, proportional controls for ease of operation and optional accessory packages give you exactly what you need to get the job done.

ES SERIES ADVANTAGES

- Lower cost of ownership.
- Exclusive application-specific accessory packages.
- Larger platforms and higher capacities.
- Three 76 cm wide models fit through narrow doorways and aisles.
- Automatic posi-traction.

NARROW OR WIDE PLATFORMS

The 1930ES, 2032ES and 2632ES feature 0.76 m narrow platforms for access through standard doorways. The 2646ES and 3246ES provide a 1.12 m platform for more workers, tools or supplies.

Longer Runtime

On a single charge, the electric drive delivers more than double the battery life of hydraulic drive machines.

One-Handed Operation

Fully proportional drive and lift control is smoother and more efficient.

Two-Piece Brake Cover

Corrosion-resistant brake assembly extends life of brakes and lowers operating costs.

Drive Motor Cable

Improved to provide strain relief and consistency when routed during services.

ACCESSORIES THAT EXTEND YOUR SCISSOR LIFT'S VERSATILITY

Workstation in the Sky® accessory packages are designed to keep your tools and components within arm's reach. Choose from packages that feature a removable workstation that optimises platform space with compartments for tools such as a reciprocating saw, drill, circular saw, battery charger and six-inch by six-inch component boxes. Plus, a pull-out tray is included to provide a flat working surface near the top of the rails.

ON-BOARD FAULT CODE DISPLAY

Get instant feedback on the status of your machine. An on-board display provides a visual indicator without the need for the analyzer, reducing troubleshooting time.

1. ELECTRICIAN'S PACKAGE

For electrical contractor applications that require battery-powered tools, the JLG® workstation keeps your tools within reach and off the floor of the platform. A stowable workbench and molded pockets provide ample storage while leaving the workspace open to get the job done.

1

2. PLUMBER'S PACKAGE

Manufacturer-approved pipe racks provide positive retention of materials for plumbing contractors, while storage outside the platform helps prevent rail damage and optimises space.

2

Easy Access

Slide-out battery trays with steel covers are one of many features to facilitate servicing.

Platform Cable

An efficiently placed cable, secured with plated steel fasteners, doesn't interfere with operator's work.

Deck Extension

Redesigned to keep debris from interfering with the extension.

Cast Wheels

Thicker, heavier cast wheels are even more resistant to abusive operation.

OUTSTANDING PERFORMANCE, ON SLAB AND OFF

Handle a wide variety of terrain, without noise and fumes. With the standard oscillating axle, 35 percent gradeability, rugged all-terrain tyres and available all-wheel drive, you'll be able to go off the slab and into the mud with the LE Series scissor lifts.

Both models will fit through standard double doorways to get you to and from the work site. The efficient direct electric drive system gives you the muscle you'll need for demanding jobs; and you'll get double the duty cycles of other electric scissors with the deep cycle batteries.

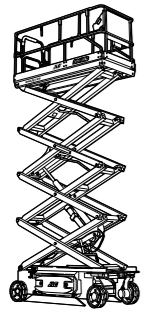

LE SERIES ADVANTAGES

- 450 kg capacity (3369LE), 360 kg capacity (4069LE) on the platform.
- Zero emissions and quiet operation for sensitive environments.
- Multi-power option features an on-board diesel-powered generator with improved fuel efficiency for lower costs.
- QuikCharge GenSet option automatically charges your lift for continuous operation.
- Platform heights of 10 m (3369LE) and 12.20 m (4069LE) provide working heights of 12 m and 14.20 m respectively.

Full-time automatic traction control and an oscillating axle boost off-slab productivity.

MAIN FEATURES

- Best on-the-job performance – Double duty cycles for longer operating times, tight turning radius for manoeuvring and positioning, and a rugged design.
- Narrow aisle models – Efficiently access hard-to-reach areas for more productive maintenance projects.
- Revolutionary new Workstation in the Sky® options and accessories.
